Analyze drives to see which extensions are the most common When launching the application, you need to select the drive you wish to inspect from the drop-down list. The analysis shouldn't take too long, but processing very large drives may be time-consuming. After the analysis is done, you will see a list of all extensions in the left-hand panel, along with the number of files of each type. If you select one of the categories, all the discovered files will be displayed in the right-hand panel. Browse files by extension and inspect them The path of every file that uses the selected extension will be displayed, along with its size and last modified date.
